Operating Limits: Suction lift up to 7m, Fluid temperature up to +60°C, Ambient temperature up to +40°C Motor synchronous speed: 3,000 r/min.

APPLICATIONS

- Distribute water from surge tank and household & civil application water-pumping use.
- Design for clean water and non-aggressive chemical liquids.
- Simple to use, quiet and virtually maintenance.
- IP55 degree of protection provide an advantage on outdoor use.

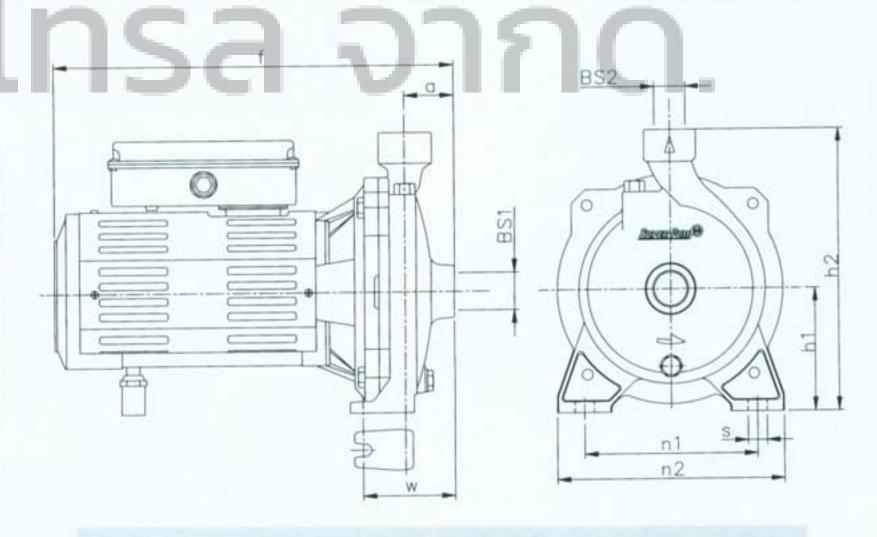

STRUCTURE CHARACTERISTICS

- Cast iron PUMP BODY with gas-threaded suction & delivery openings drain & fill plugs.
- Steel MOTOR FRAME use epoxy painting to provide rust resistance.
- Stainless steel or cast iron PUMP COVER incorporated in motor bracket.
- Stainless steel IMPELLER, centrifugal radial flow type.
- Stainless steel MOTOR SHAFT.

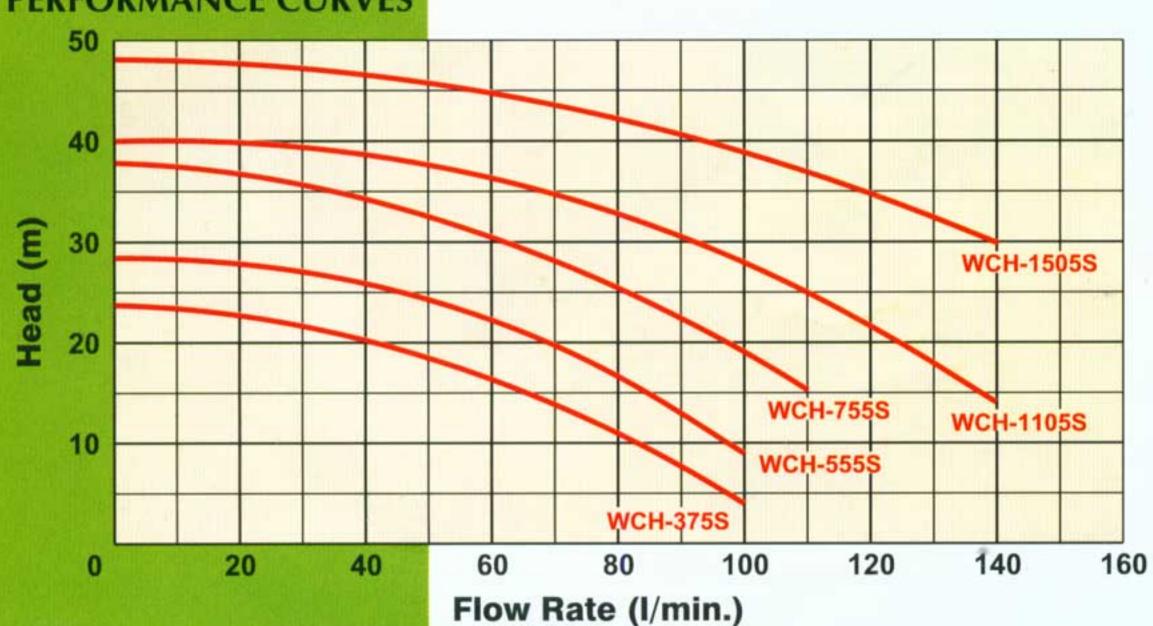

- Ceramic and graphite MECHANICAL SEAL.
- Pumps are directly coupled with the best proper MITSUBISHI induction motors which reach high efficiency and reliability.
- Thermal protector is incorporated in motor. (except WCH-1505S model)
- IP55 degree of protection.
- Class F motor insulation.
